In class today
1) Get/pull my code from GitHub (https://github.com/cvanlent/SI206)
2) If you don't have one, create Twitter account
3) Create Twitter app: https://apps.twitter.com/
    a. This will create an
        i. access_token
        ii. access_token_secret
        iii. consumer_key
        iv. consumer_secret
4) Update the code in each file to include this new information:
    access_token = "YOUR CODE HERE"
    access_token_secret = "YOUR CODE HERE"
    consumer_key = "YOUR CODE HERE"
    consumer_secret = "YOUR CODE HERE"
5) Run each file. There is a good chance you will be missing some sort of package. Use pip install in each case.

Discussion Section assignment:

1) Place a copy of the Homework3 material from GitHub into your own account. Add me and Younghun as collaborators.

2) Submit the URL to Canvas.
